**Mission Statement:**

As part of the Value Analysis Programs, our mission is to seek opportunities to offer clinically effective devices, implants and equipment while reducing costs and improving patient safety and performance through the cost-effective selection & standardization of products, equipment, clinical technology and related processes.

Working collaboratively, surgeons, nursing, administration, procurement and materials management, will tap into our collective power and experience, challenging current practices and promoting innovative solutions, while improving the quality of care provided to our patients.
